

UK National Roofing and Polyurethane Spray Foam Insulation Contractor

Rooftherm are specialist roofing contractors and work all over the UK and occasionally into Europe. We do new roofs, re-roofs and roof renovation and repairs. We are also specialist polyurethane spray foam contractors for roof insulation, roof stabilisation, domestic and industrial roofs.

Polyurethane foam can be applied to roof slates and tiles, ship hulls (we do quite a number of canal longboats), underfloor draft sealing and insulation, party wall sound and thermal insulation, industrial roof (e.g. asbestos big 6), metal or steel buildings and spray foam and silicon rubber coatings for sealing.
